Postdoctoral Associates in Cosmology

The Leibniz-Institute for Astrophysics Potsdam (AIP) invites applications for several postdoctoral associate positions in the area of cosmology and large-scale structure research. The candidates will be expected to contribute either to gas-dynamical simulations of galaxy formation in the local universe and at high redshifts, the intergalactic medium and reionisation, or to the analysis of large-scale structures in galaxy or cluster redshift surveys in comparison to simulations.

The AIP is located in the beautiful Potsdam/Babelsberg area, at the southwestern border of the Berlin metropolitan area. About 100 scientists work on a variety of astrophysical topics, ranging from stellar activity to extragalactic astrophysics. Potsdam is also the home of the Albert-Einstein-Institute for Gravitational Physics, the Physics & Astronomy department of Potsdam University and several other research institutions.

Starting in 2012, the initial appointment will be made for 2 years, with a possible extension by a 3rd year. Senior applicants may be appointed for 3+2 years. The salary will be based on the German public service scale (TV-L). The AIP is an equal opportunity employer and particularly encourages applications from women. It values diversity.

To apply, please send a curriculum vitae including statements on education and research experience to the given address. Applicants should arrange for three letters of recommendation to be sent to the same address. Review of applications will begin in December, 15, 2011, and continue until the positions are filled.

Including Benefits:

Employer contributions to medical and dental insurance, maternity leave, and retirement benefits.
