

Leibniz-Institut für
Astrophysik Potsdam

Third Potsdam-Berlin Astronomical Colloquium

Date: June 20, 2014

Venue: Leibniz-Institut für Astrophysik Potsdam (AIP)

An der Sternwarte 16, 14482 Potsdam

Schwarzschildhaus, Lecture hall

<http://www.aip.de/en/institute/locations/transport/babelsberg>

Program:

14:00 Matthias Steinmetz (AIP): Welcome address

14:05 Wolf-Christian Müller (TUB)
Investigations of plasma turbulence

14:35 Helge Todt (UP)
Hydrogen deficient central stars of planetary nebulae

15:05 Cristina Chiappini (AIP)
New observational constraints to MW chemodynamical models

15:35 Coffee break

16:05 Igor Telezhinsky (UP)
Cosmic rays and their radiation in young supernova remnants

16:35 Rainer Arlt (AIP)
Magnetic fields on stars – stability, activity and dynamos

17:05 Bier & Grillwürstl
